Average VRFB energy storage price per 800kW in Greece

Overview

How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

How often should energy storage projects be completed in Greece?

Investors will be expected to submit progress reports every three months to ensure timely construction. Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of €49,748/MW per year.

How much does an energy storage auction cost in Greece?

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest successful bid set at €44,100/MW per year.

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities .

How long should energy storage be in a Greek power system?

Considering the energy arbitrage and flexibility needs of the Greek power system, a mix of short (~2 MWh/MW) and longer (>6 MWh/MW) duration storages has been identified as optimal. In the short run, storage is primarily

needed for balancing services and to a smaller degree for limited energy arbitrage.

How much does a 1 GW energy storage tender cost?

The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh). The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year.

Greece awards 300 MW in storage tender

Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of EUR49,748/MW per year.

GREECE

Law 4951/2022 has set the basis for storage development in Greece, making Greece one of the first countries in Europe to adopt a legal and licensing framework specifically for energy storage.

While lithium-ion dominates short-duration storage, vanadium redox flow batteries (VFBs) are gaining traction for multi-hour applications. In 2023, the average VFB system cost ranged ...

Efficient Higher Revenue

- Max. Efficiency 97.3%
- Max. PV Input Voltage 600V
- 100% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overloading
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart 1-1V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPC Switching Under 30min
- Compatible with Lead acid and Lithium Batteries
- Max. Current Inverter Flexible
- AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation
