Average enterprise ESS system price per 2MW in Italy

Overview

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW / 11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.

What are Italy's energy storage goals?

Energy Storage Goals: To balance the grid with increased renewable energy, Italy targets 11 GW / 58 GWh of grid-scale energy storage capacity by 2030, requiring substantial investment and development.

How does Italy's electricity market work?

Zonal Market Dynamics: Italy's electricity market is a zonal market, with seven geographic zones affecting short-term price volatility and influencing BESS investment strategies. MACSE Subsidy Scheme: The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue.

How much does energy storage cost?

****Battery Cost****: The battery is the core component of the energy storage system, and its cost accounts for a significant portion of the total cost. As of 2024, the cost of lithium-ion batteries, which are widely used in energy storage, has been declining. On average, the cost of lithium-ion battery cells

can range from \$0.3 to \$0.5 per watt-hour.

How much does an EMS system cost?

It can account for about 2% to 5% of the total system cost. Assuming an EMS cost ratio of 3% for a 2MW system with a total system cost (excluding the EMS) of \$864,000 (the sum of the battery and BMS costs), the cost of the EMS would be $\$864,000 * 0.03 = \$25,920$.
