

## Overview

---

On average, the cost of lithium-ion batteries for large-scale storage applications can range from \$100 to \$300 per kilowatt-hour (kWh) of capacity. For a 50MW/50MWh system (assuming a 1-hour discharge duration), the battery cost alone could be between \$5 million and \$15 million.

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be.

The conditions are in place for the country's battery energy storage market to expand at a compound annual growth rate (CAGR) of 20% to 30%, as Holu Solar's Sophia Costa explained. From ESS News Brazilian energy suppliers raised the red flag in September 2024, signaling a rise in electricity costs.

Deployment of behind-the-meter (BTM) energy storage in commercial, industrial, and residential sectors is gaining traction as end-users seek energy cost savings and backup power capabilities. Declining lithium-ion battery costs and advancements in battery chemistry are making large-scale energy.

The battery storage business is still in its infancy in Brazil, and no comprehensive rules governing the deployment of such technologies exist – either for utility-scale or small-scale projects. So far, only a few projects or

businesses have been disclosed, namely: (i) ISA CTEEP, with batteries.

The Battery Energy Storage System (BESS) market in Brazil is witnessing growth as utilities, renewable energy developers, and commercial customers deploy energy storage solutions to enhance grid stability, integrate renewables, and reduce electricity costs. BESS enables peak shaving, demand. Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

Are battery energy storage systems at a premium in the future?

Flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future.

Are energy storage products coming to Brazil?

Holu's Costa observed batteries were prominent during the Intersolar South America trade show held in São Paulo at the end of August 2024. She added, hundreds of manufacturers are bringing energy storage products to Brazil.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

How much battery storage will the world have in 2023?

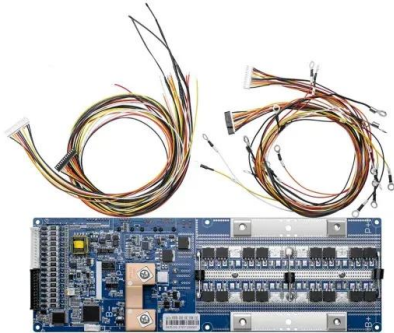

That trend is corroborated by a recent study by the International Energy Agency, which predicted the volume of global installed battery storage will rise from 200 GW, in 2023, to more than 1 TW by 2030, and almost 5 TW by 2050.

Could pumped hydro be the missing piece in Brazil's energy system?

Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed

to enhance the country's energy system.

## Average large scale battery storage price per 50MW in Brazil

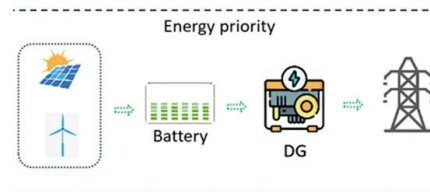

### 'Brazil could have \$3.8bn battery energy storage ...

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity by 2030, led by Chinese and United States markets dominated by utility-scale systems.

### Levelized Cost of Storage for Standalone BESS Could ...

The report adopts a two-pronged approach to estimate the cost of Li-ion based MW scale battery storage systems in India. The report takes the case of solar projects in Nevada, which are coming online in 2021, with 12-13% ...
