How much does Microgen cost in Ireland?

Electric Ireland's current Microgen Export rate is 19.5c per kWh. This rate is variable and subject to change. We estimate that customer export payments will range between €50-€300 per year, depending on the size and type of your microgeneration system (a typical installation of 10 panels would be about €150 per year). When will my payment start?

.

Which Irish electricity supplier offers the best microgeneration rate?

As of August 2025, Pinergy are offering the best microgeneration rate of 25.0 cents per kWh including VAT. Below, you will find a table outlining the Irish electricity supplier's current microgeneration rates: Rates include VAT. Last updated: August 2025.

What is Electric Ireland's Microgen export rate?

Electric Ireland is supporting customers on their low-carbon journey with a current Microgen export rate of 19.5c per kWh. To view this content, please enable cookies. To view this content, please enable cookies. What is microgeneration?

.

How much does it cost to export a microgeneration system?

We estimate that customer export payments will range between €50-€300 per year, depending on the size and type of your microgeneration system (a typical installation of 10 panels would be about €150 per year). When will my payment start?

On receipt of the NC6 form, ESB Networks will set up your export account.

How does microgeneration work in Ireland?

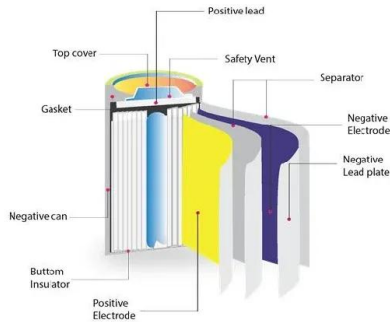

Microgeneration involves installing a small generator powered by a renewable source such as wind, solar or hydropower, and connecting this to the electricity network. Solar photovoltaic systems generate electricity during daylight hours only, predominately around the middle of the day. In Ireland, around 75% is produced from May to September.

How much does Energia charge for microgeneration?

Unlock the potential of your home or business to generate clean energy and earn with Energia's Microgeneration support. Energia currently offers a competitive rate of 20 cent (€0.20/kWh) for every unit of surplus electricity you export back to the grid. What is Microgeneration and Feed-in-tariffs?
