Average microgrid storage price per 5kWh in Norway

Overview

The quarterly electricity price statistics include information about average electricity prices for households, services and manufacturing in addition to the wholesale market.

The quarterly electricity price statistics include information about average electricity prices for households, services and manufacturing in addition to the wholesale market.

Øre/kWh Breakdown of electricity sales by volume. Per cent MANUFACTURING EXCL. ENERGY-INTENSIVE MANUFACTURING 1 Average for all types of contracts, incl. new fixed-price contracts and variable price (not tied to spot price). Pulp and paper industry is included in energy-intensive manufacturing.

For example, the 2024 average household price (including grid and taxes, excluding one-time support) was about 134.9 øre/kWh. This breaks down as roughly 59.9 øre/kWh actual electricity energy cost, 36.0 øre/kWh for grid rent (transmission + distribution), and 39.0 øre/kWh in taxes.

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. For utility operators and project developers, these economics reshape the fundamental calculations of grid.

Driven by a mix of hydropower heritage, smart regulation, and growing interest in wind and solar, the Norwegian energy sector offers a glimpse into what a green, flexible, and market-driven electricity system can look like. ☐☐ 100% Renewable?
