The price of LFP cells is over 20% lower than nickel cobalt manganese (NCM) cells. The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America.

Lithium nickel cobalt aluminum oxide (NCA) battery cells have an average price of \$120.3 per kilowatt-hour (kWh), while lithium nickel cobalt manganese oxide (NCM) has a slightly lower price point at \$112.7 per kWh. Both contain significant nickel proportions, increasing the battery's energy.
