IEA analysis based on material price data by S&P (2023), 2022 Lithium-Ion Battery Price Survey by BNEF (2022) and Battery Costs Drop as Lithium Prices in China Fall by BNEF (2023). Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted.

As natural and synthetic graphite, lithium carbonate and hydroxide, and nickel, cobalt and manganese sulphate prices decline further, the raw materials bill for the average EV is now down to \$510 compared to \$918 in October 2023 and a monthly peak of more than \$1,900 at the beginning of last year.

This includes benchmark prices for lithium and cobalt, two battery materials that continue to experience market volatility and supply/demand imbalances. Our widely used prices are market-reflective, assessing both the buy- and sell-side of transactions. Trade with relied upon price data that is.

Lithium nickel cobalt aluminum oxide (NCA) battery cells have an average price of \$120.3 per kilowatt-hour (kWh), while lithium nickel cobalt manganese

oxide (NCM) has a slightly lower price point at \$112.7 per kWh. Both contain significant nickel proportions, increasing the battery's energy. How much does cobalt cost in 2022?

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.

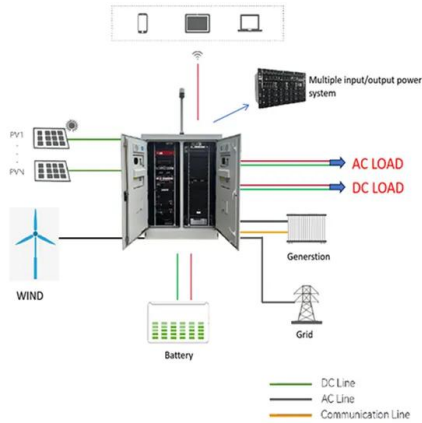

What is the difference between lithium ion battery prices and nickel prices?

Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for global pricing, although most nickel trade takes place through direct contracts between producers and consumers.

Why are cobalt prices consolidated?

In the weeks following confirmation that the cobalt market will face an additional three months of no exports from the Democratic Republic of Congo (DRC), metal prices have consolidated as participants point to the future for bullish sentiment.
