# Average photovoltaic ESS price per 30kW in Brazil

## Overview

---

Is rooftop PV a viable option in Brazil?

Rooftop PV accounts for around 70% of the installed PV capacity in Brazil, and as the information about the widening price difference between solar electricity and retail electricity tariffs spreads, more and more residential consumers embark on the rooftop PV option.

Why is PV the second largest contributor to Brazil's electricity mix?

Favorable net metering legislation, rising conventional electricity tariffs, and consistent and strong downward trends in photovoltaic equipment prices in recent years have led PV to become the second largest contributor to Brazil's electricity generation mix.

What is the PV uptake rate in Brazil in 2023?

Image: TAIS HELENA DE CARVALHO, Unsplash In 2023, PV uptake in Brazil grew at a rate of more than 1 GW per month (70% of that rooftop PV), and the cumulative installed PV capacity reached over 37 GW. The deployment rate is 60 W per person per year and is fast enough to double the installed capacity every two years.
