What is ESS access & how does it work in Singapore?

Led by EMA, the ACCESS programme helps to facilitate ESS adoption in Singapore by promoting use cases and business models. It also looks at securing space, marrying demand with solution, and facilitating regulatory approvals for ESS deployment. Singapore's First Utility-scale Energy Storage System.

What is energy storage systems (ESS)?

MS FOR SINGAPORE<sup>1</sup> Executive Summary 1.1 Energy Storage Systems ("ESS") is a game-changing technology that potentially has significant benefits for Singapore. ESS's unique characteristic is that it can allow energy produced at a particula.

What is Singapore's first utility-scale energy storage system?

Singapore's First Utility-scale Energy Storage System Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is equivalent to powering more than 200 four-room HDB households a day.

Can ESS help Singapore move towards a low-carbon energy system?

In its policy paper, EMA reiterated that ESS "could help Singapore to move towards a low-carbon and more flexible energy system". "The EMA will continue to monitor developments in other jurisdictions and see how lessons can be applied to Singapore," it said.

Does Singapore need a wider deployment of ESS?

However, Singapore critically needs the technology and the innovative urban deployment topologies that can enable a wider deployment of ESS to match the rise of renewable energy to meet the ever-increasing energy demand. In

Q4 2023, the EMA had put out a grant call to invite proposals for facilitating the wider deployment of ESS in Singapore.

Does ESS need to scale in Singapore?

In Q4 2023, the EMA had put out a grant call to invite proposals for facilitating the wider deployment of ESS in Singapore. It is instructive to note that while grid-scale ESS needs to scale, there remain various challenges to ESS deployment, including the need for ESS solutions that are safer, denser and/or more cost-effective.
