Average residential ESS price per 10kW in Switzerland

Overview

The residential electricity price in Switzerland is CHF 0.320 per kWh or USD 0.398. The electricity price for businesses is CHF 0.277 kWh or USD 0.344. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and.

The residential electricity price in Switzerland is CHF 0.320 per kWh or USD 0.398. The electricity price for businesses is CHF 0.277 kWh or USD 0.344. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and.

The average day-ahead electricity price of the last 7 days for the European countries shown here is shown. The trend arrow shows the development of the price compared to the average price of the last 10 periods. Electricity prices on the markets are an important indicator of the current market and.

There, 1 kWh of electricity will cost around 31.61 Rp in 2024. Search for your region or municipality on the map and then enter the costs in the last item in the electricity calculator. These costs have risen sharply in the past year. In 2023, for example, 1 kWh still cost 21.88 Rp. It is therefore.

The residential electricity price in Switzerland is CHF 0.320 per kWh or USD 0.398. The electricity price for businesses is CHF 0.277 kWh or USD 0.344. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare.

In the cheapest municipalities, you pay just about 10 centimes per kilowatt-hour (kWh). In the most expensive municipalities, you pay almost 50 centimes per kilowatt-hour. The average (median) price across all Swiss power companies is 29 centimes per kilowatt-hour (data for 2025). What is included.

Peak tariff: Monday to Saturday, 6 am to 10 pm Off-peak tariff: all other times
Our electricity tariffs for electromobility, our solar tariffs and further information and details can be found in the file 'Overview of tariffs 2024'. The energy price component covers the cost of producing and.

With the electricity price today in Switzerland you can save 0.33 € for each shower. Lighting is not the thing that uses the most electricity, but it can still be a good investment to switch to energy-efficient and LED lights. These provide up to 10x more light with the same amount of energy. What. How is electricity paid in Switzerland?

The electricity price paid by Swiss households consists of three components. These are the grid costs (delivery from the power plant to the customer), the production costs and the taxes (water rate, compensatory feed-in remuneration - KEV, etc.). They each amount to approximately one third of the final price for the consumer.

Should the Swiss electricity market be liberalized?

The complete liberalization of the Swiss electricity market is controversial in politics. With the rapid and sharp rise in electricity prices in the wake of the geopolitical upheavals, efforts to liberalize have stalled. Axpo remains convinced that the electricity market should also be fully opened up in Switzerland.

How many electricity supply companies are there in Switzerland?

The electricity supply to Swiss end customers is ensured by some 630 electricity supply companies. Many of the municipal utilities are also responsible for supplying their customers with water and gas.

What is the electricity mix in Switzerland?

The Swiss electricity mix varies from year to year, depending on the availability of different forms of production. Basically, around 60 percent comes from hydropower, around 30 percent from nuclear power and around 10 percent from new renewable energies. PV has been increasing for several years, while growth in wind power remains modest.
