# Average residential ESS price per 30kWh in Germany

## Overview

---

Germany - Household electricity prices . Germany - Household electricity prices Ger.

Germany - Household electricity prices . Germany - Household electricity prices Ger.

Ger.

As of 2025, the average household electricity price is about €0.3969 per kWh (39.7 cents). This final price can be broken down into key components for a typical residential customer: Energy Procurement & Retail: Roughly 40% of the price (~16.0 ¢/kWh) is the base energy cost – i.e. the charge for.

Electricity and energy prices are on the mind of the German population. Costs are rising during the ongoing energy crisis, with the subject being particularly acute in the colder winter months, when households, businesses and industries rely on heating and electricity at increased levels.

Private users pay an average of 33,5 cents per kWh for electricity. 3. Natural gas is mainly used for heating and less for cooking. 4. You can choose between 1,000 natural gas providers in Germany. 5. Depending on where you live, the cost of water in Germany can vary greatly. 6. Tap water in.

The Bundesbank's Statistics section provides a comprehensive overview of current and historical data at both the national and international levels.

This is -24% less than yesterday. Electricity prices in Germany have been a topic of significant interest in recent years, due to the country's transition towards a renewable energy system and the fluctuating costs of electricity production. Germany has made substantial investments in renewable. How much does electricity cost in Germany?

In the last twelve months the price of electricity in Germany has fallen by 5.62%. In Germany, the price of electricity reached its maximum price, € 0.4125kWh, in June of 2023. Its minimum price was €0.2025 kWh,

corresponding to June of 2007. Germany is the country in Europe with the most expensive electricity.

How much do home utilities cost in Germany?

During the past few years, the cost of home utilities has risen by quite a bit. 1. In Germany, all households are connected to the electricity network. 2. Private users pay an average of 33,5 cents per kWh for electricity. 3. Natural gas is mainly used for heating and less for cooking. 4.

What is the longest interval in electricity production in Germany?

The longest interval to date was 36 consecutive hours in 2023. The following figure shows for various years which technologies were used to generate electricity in hours with negative prices in Germany, broken down by different price levels (0 to -10 €/MWh, -10 to -20 €/MWh, etc.).

Which country in Europe has the most expensive electricity?

Germany is the country in Europe with the most expensive electricity. When looking at the difference between the price of electricity with and without taxes, we see that households in Germany paid € 0.1145 in taxes for each kilowatt hour, which means that 28.98% of what consumers pay for electricity is in concept taxes.

Why are energy prices rising in Germany?

Electricity and energy prices are on the mind of the German population. Costs are rising during the ongoing energy crisis, with the subject being particularly acute in the colder winter months, when households, businesses and industries rely on heating and electricity at increased levels.

How much does electricity cost per kWh?

It resides at 19,86 cents per kWh. The considerable difference in pricing lies in the amount of electricity consumed by industries and businesses. While private homes usually consume between 1,000 and 5,000 kWh, industries sometimes consume up to 10,000,000 kWh per year. As I mentioned above, electricity is one of the most important home utilities.
