

## Global PV Storage Insights

# Average residential ESS price per 800MW in Philippines

## Overview

---

DIPC Energy Results - Final DIPC Energy Results - Raw Generator Weighted Average Price (Original) Load Weighted Average Prices (Original).

DIPC Energy Results - Final DIPC Energy Results - Raw Generator Weighted Average Price (Original) Load Weighted Average Prices (Original).

The Energy Regulatory Commission (ERC) reported a decrease in the average cost of electricity traded at the spot market in 2023, ending two consecutive years of increases. According to ERC's market analysis, the average effective spot settlement price (ESSP) for all grids across the Philippines was.

es in the Philippines remain among the highest in Southeast Asia, along with Singapore (Figure 1). In December 2021, the Philippines' residential rate was \$0.16/kWh, second to Singapore (\$0.18/kWh) and higher than Thailand (\$0.10/kWh), Indonesia (\$0.10/kWh), and Malaysia (\$0.05/kWh). Meanwhile, the.

Here is a table demonstrating the average residential electricity prices in these countries: Looking at developed countries such as South Korea, Japan, and various nations in Europe and North America, the Philippines' electricity prices seem excessively high, especially when you factor in the.

All systems are based on state-of-the-art Alpha-ESS SMILE5 inverters, Lithium-Iron Phosphate (LiFePO<sub>4</sub>) batteries and 315w JA Solar panels. You can use any size hybrid system you like even if your monthly bill is more than it is able to produce. For example, if your monthly bill is ~P10,000/month.

SAIFI takes a look at the number of service interruptions for the average customer per year. Getting electricity: System average interruption frequency index (SAIFI), DB16-20 methodology (2019) Source: DOE. "List of Existing Power Plants." Doe.gov.ph, 8 May 2021.

Electricity prices in the Philippines have taken a notable dip in 2025. The first half of the year has seen the average spot market price hover around PHP 4 per kilowatt-hour, a sharp fall from PHP 5.80 over the same period in 2024. For

consumers, this spells relief. For generators, especially. Why is electricity so expensive in the Philippines?

Key contributors include reliance on imported fuel, inefficiencies in the power grid, high system losses, and market structures that don't favor consumers. Unlike other countries that benefit from abundant local resources or well-managed energy systems, the Philippines grapples with challenges that make electricity expensive for everyone.

How much does a spot settlement cost in the Philippines?

According to ERC's market analysis, the average effective spot settlement price (ESSP) for all grids across the Philippines was Php 6.505 per kilowatt-hour, which is over Php 1 cheaper compared to the average ESSP of Php 7.885/kWh in 2022.

How much does transmission cost in the Philippines?

21%. Transmission charges, on the other hand, made up about 9%. Transmission losses were about 4%. As previously noted, the Philippines has a high system loss by regional standards. Taxes (1 %) and subsidies (2%) include universal charges.

How much does Meralco cost a month?

city rates are for 101-200 kWh consumers and are computed by averaging the monthly rates for 2020. A residential customer with 200 kWh a month in Meralco's franchise area had a monthly bill of about \$36, using the average price of USc 17.91/kWh in 20.

How much range is the cost of energy supply?

range, about 66% of the actual cost of supply .18.37.35.15.3 4.30 Thailand South Korea Indonesia Malaysia Source of primary data: Meralco-commissioned study by the International Energy Consultants (2018). Note: The implied subsidy is calculated by subtracting the actual tariff from the long-

Why is thermal gas efficiency higher in the Philippines than in Indonesia?

compatibility problem for operators since they can profit by continuing to operate at a minimum cost. On the other hand, Figure 5 shows the thermal gas efficiency in the Philippines is higher than that in Indonesia, Thailand and

Malaysia mainly because it was the high-efficiency gas plant introduced in the Philippines in 2000 (Yokota & Kutani, 20
