With support from the Strengthening Institutional and Economic Resilience in Yemen (SIERY) Project, funded by the European Union, local authorities have installed solar energy systems in 17 schools across Mukalla, Tarim, and Al-Qatn. This initiative aimed to improve both the learning environment.

The project provides updates on the status of solar PV market including the local supply chain of solar PV products, the available technical specifications and the prices and quality of solar PV systems components (i.e. PV panels, charge controllers, inverters and batteries). It also highlights the.

While the report identifies central drivers for the diffusion of solar energy, it also discovers critical barriers: Since 2017, growth in the solar sector has been stagnating, since bottlenecks in the sector hamper a further diffusion. The article concludes with a set of recommendations for both.

In Hadramout Governorate, Yemen, the installation of solar energy systems in schools has emerged as a pivotal development in addressing the chronic

energy shortages that have long hindered the functioning of the governorate's education sector. With support from the Strengthening Institutional and.

Across #Yemen, UNOPS is working with the World Bank's International Development Association to provide essential urban services for people affected by the ongoing conflict and humanitarian crisis. At Al-Khansa'a School in Hadramout, a recently installed solar energy system is helping tackle.
