Maximize energy independence with a 10kW hybrid solar system designed for Caribbean climates. This grid-tied solution harnesses abundant sunlight to power your home or business while storing excess energy in integrated batteries for nighttime use. Sell surplus electricity to local utilities through.

With the initial evaluation we're able to determine payoff period and ROI. The solar systems we install typically have a payback between 4-7 years and a 18-20% return each year. We design every solar system specific to our customers needs, by choosing panels and inverters that maximize the solar.

If you're a homeowner in Nassau eyeing solar panels, a resort owner in Freeport tired of diesel generators, or a climate tech investor scouting Caribbean opportunities - this Bahamas energy storage subsidy policy is your golden ticket. But hey, even if you're just a curious sun-worshipper wondering.

In a remote area of the Bahamas, a residential home transitioned from full-time diesel generator reliance to a sustainable, cost-effective off-grid solar solution. By implementing Sol-Ark inverters and HomeGrid storage, this project cut inflated energy costs and environmental impact. The homeowner.
