Can I add a 5KVA inverter to a 10kVA Solar System?

Apart from mixing and matching, the setups are also modular so if the goal is a 10KVA system but the budget only allows for a basic level 5KVA, you can get a 5KVA now and when the budget allows, add another 5KVA later. All that's involved is another 5KVA inverter and double the solar panels plus a couple switches and cables.
