

## Global PV Storage Insights

# Average solar storage container price per 15MW in Portugal

## Overview

---

How much does a solar system cost in Portugal?

The Portuguese Government came into this auction expecting to obtain 33.5 thousand euros per MWh, but the winners ended up paying to 37.1 thousand euros per MWh to the system. Also, the World record for the lowest output price was broken once again with a bid of €0.0112/kWh. In Spain, the development of solar energy started earlier.

Is Portugal's solar auction a new era of battery storage?

Portugal's recent PV auction marks a new era of battery storage for the country, says UK consultancy Everoze. It notes that the auction was so competitive that the winners had to cut their expected remuneration in the solar+storage category to negative values.

How has solar technology changed the energy industry in Portugal?

Particularly in solar, there has been a significant reduction of costs associated with PV technology since 2017 which, alongside with the high level of predictability of solar resources, has led to an increase of the number of requests for energy production licenses in Portugal.

How much does solar cost in Spain?

The average price for solar was set at 0.02447/kWh and the lowest bid at €0.01498. The most successful bidder has been X-Elio Energy with 315 MW of PV capacity, followed by Iberdrola subsidiary Iberenova Promociones (243 MW) and Spanish utility Naturgy (196 MW).

How much does a mw project cost in Portugal?

The first Portuguese auction under this new regime, in August 2019, awarded 1150 MW, distributed by 22 projects. Bids were submitted by two different pricing schemes: the guaranteed remuneration tariff where the average result has been of €22,22 p/MWh; and the market scheme, with an average tariff

offered of €18.36 p/MWh.

Will Spain and Portugal reach 37 GW of solar power?

This is a market with high growth potential where, until the end of 2030, Portugal intends on reaching 9 GW of solar photovoltaic ("PV") installed capacity, and Spain has set the objective of reaching 37 GW, against a current installed capacity of, respectively, 1,030 MW and 11,547 MW.
