# Average solar storage container price per 50kWh in Greece

## Overview

---

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

How is storage regulated in Greece in 2022?

In 2022, the Greek Parliament also passed a thorough regulatory framework for storage. Large-scale storage are selected through a bidding process, with a total tendered power capacity of 1,000 MW and at least 2.6 GWh of storage capacity.

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

Why is solar power growing in Greece?

However, the utility-scale and residential self-consumption segments are experiencing noteworthy growth for the first time. The bright weather across the country helped solar PV to contribute to some 13.6% of total Greek electricity production in 2022, breaking yet another record.

How many MW is a battery energy storage system?

It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions. In the latest bidding, nine

projects with a four-hour storage duration have been selected for a total capacity of 188.9 MW.

How did the weather affect solar power in Greece in 2022?

The bright weather across the country helped solar PV to contribute to some 13.6% of total Greek electricity production in 2022, breaking yet another record. This outshined the expected 13% share of solar in meeting gross electricity demand.
