Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's.

The tender process concluded shortly before the end of 2020, awarding distribution grid-connected solar capacity paired with four hour duration energy storage at a clearing price of 17.45 Shekel cents per kilowatt-hour (US\$0.0544/kWh). A total of 55 bids were received, from 10 companies, totalling.

In the realm of carbon reduction, Israel has set an ambitious target for installed energy storage by 2050, aiming for 50GW/230GWh with an average storage duration of approximately 4.6 hours. Currently, as part of its energy strategy, Israel has crafted several promotional policies to expedite the.

The government has announced plans for Israel's first stand-alone energy-storage facility, consistent with the aims underpinning a revised draft climate bill (legally enshrining targets for carbon-free power generation). We expect renewables capacity to expand rapidly in 2023-27, as the government.
