# Average utility scale ESS price per 200MW in Israel

## Overview

---

What are base year costs for utility-scale battery energy storage systems?

Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2023). The bottom-up BESS model accounts for major components, including the LIB pack, the inverter, and the balance of system (BOS) needed for the installation.

How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW / 4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

How many MW of electricity will be built in Israel?

Northern Israel: Bi-Liht, Noy Agira, Allied, and Ormat will develop four facilities totaling 520 MW at an average tariff of 2.0 agorot per kW. Arava: Enlight and

EDF will establish three projects with a combined capacity of 420 MW at a 3.0 agorot/kW tariff.

How much storage capacity will allied infrastructure have in Israel?

These projects will have a total storage capacity of 1,300 MWh, potentially increasing to 1,900 MWh after entering the deregulated market. Ormat Technologies, in partnership with Allied Infrastructure, also announced it won tolling agreements for 300 MW/1,200 MWh of storage, marking its entry into Israel's large-scale energy storage sector.
