BESS project financing options in Ethiopia 2030

Overview

Is blended financing a viable financial model for Bess projects?

As per McKinsey & Company, the market size of the BESS ecosystem is expected to reach \$150 billion by 2030. Thus, blended financing as a financial model should be considered, where public capital can be used as a first-loss capital for BESS projects. This offers private financiers the comfort of providing capital at a competitive rate.

What is Ethiopia's 2025 to June 2030 programme?

The country programme for July 2025 to June 2030 builds on lessons from the previous programme cycle, Ethiopia's Sustainable Development Goals acceleration plan, and ongoing reform efforts.

Can a Bess project be issued as a green bond?

Independent BESS projects can be bundled together and issued as green bonds to potential large investors. A partial credit guarantee can be provided by public capital providers to improve the credit ratings of green bonds, which is necessary to attract these low-risk-seeking investors.

What are the challenges preventing the adoption of Bess?

There are several challenges hindering the adoption of BESS, and one of the key challenges is financial risks due to technology risks and the absence of a secured financial model. Technologies are still at an early stage, and performance record is limited.

How can Ethiopia Reen growth through five interconnected priorities?

reen growth through five interconnected priorities. The first priority, implemented by the Ethiopia Disaster Risk Management Commission and the United Nations Office for Disaster Risk Reduction (UNDRR), focuses on improving multi-hazard disaster risk management systems and building resilience at both community and institutional levels to.

Is Bess a good investment?

Although risk-taking investors seeking a higher return on their investment in BESS can translate into higher energy tariffs, it is not ideal for large-scale adoption of BESS. Moreover, the capital available with this class of investors is limited compared to this solution's growth potential.
