What is a hybrid & energy storage system?

Atlas Copco's hybrid & energy storage system is the solution. It connects Power Modules to other energy sources, such as solar, wind and hydro, as well as to energy storage stations like batteries. How does a hybrid & energy storage system work?

.

Why should you install ESS / solar battery systems in Singapore?

This gives you greater energy control, cost savings, and reliability across any site type in Singapore. Integrating an ESS / solar battery system offers numerous advantages: Use more of the clean energy generated by your own solar panels instead of exporting it. Reduce your reliance on purchasing electricity from the grid.

Why should you choose a hybrid power station?

A hybrid power station will drastically lower the interactions needed onsite. Less interactions means less logistic flows, less security risks. and a more reliable power solution. Power when and where you need it, with the lowest ecological footprint. Once your energy module is charged, you can enjoy quite and sustainable power.
