Container energy storage project financing options in Belgium 2025

Overview

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

Are merchant-exposed projects sourcing project finance in Belgium?

“We have seen similar or even much bigger merchant-exposed projects sourcing a large share of their financing through project finance in the Netherlands recently, but Belgium is a bit more complex market,” BStor’s Pierre Bayart said.

What projects are being built in Belgium?

The trio’s consortium has previously worked on ESTOR-LUX (10MW/20MWh), Belgium’s first high-voltage grid-connected BESS, which went online at the end of 2021. It is currently also working on D-STOR, a 50MW/140MWh project for which financial close was achieved in Q3 2024, and construction began earlier this year.

Will bstor build a pipeline of large-scale battery projects?

With the business model “now demonstrated at full scale,” Bstor and its partners intend to build out that pipeline of large-scale battery projects, the managing director said. Across two packed days, the Summit focused on three core themes: revenue & trading, the lifecycle of the battery, and optimisation tools.
