

## Global PV Storage Insights

# Containerized BESS tender price in Netherlands 2025

## Overview

---

Buyer Expectations: €25,000-€50,000/MW (Mid: €37,500/MW) Seller Expectations: €50,000-€70,000/MW (Mid: €60,000/MW) Transaction Range: €37,500-€55,000/MW (Mid: €46,250/MW) How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

What is Bess in the Netherlands?

BESS in the Netherlands is a new and small but increasingly necessary industry. A striking growth in battery capacity began in 2021 when the total installed capacity rose by 65% compared to the previous year. This number doubled in 2022 and then tripled in 2023, reaching 621 MWh.

What is a Bess deployment scenario?

To address the need for more storage (brought on by the rapid renewable buildout), Dutch grid operators developed mid (KA), high (ND), and low (IA) deployment scenarios for the further rollout of BESS technology. Specifically for grid-scale and co-located solar, these range from 5.2 GW to 12.7 GW by 2030 and from 8 GW to 19.5 GW by 2035.
