

Global PV Storage Insights

Expected ROI of BESS project in Switzerland 2026

DISTRIBUTED PV GENERATION + ESS

Overview

What factors affect the ROI of a Bess?

External Factors that influence the ROI of a BESS The cost of electricity, including peak and off-peak rates, significantly impacts the ROI. Energy storage systems can store cheaper off-peak energy for use during expensive peak periods.

How to assess the financial viability of a Bess?

To accurately assess the financial viability of a BESS, several key indicators are used. This is a list of the main indicators we need to know and understand in order to assess the ROI. Here, we explain briefly what each one means: Total Cost of Ownership (TCO) The comprehensive cost of owning and operating the ESS over its entire life cycle.

How long does it take to negotiate a Bess project?

Though complex and time-intensive to negotiate, often taking several months to a year, these agreements are quietly becoming the preferred model for BESS projects over 100 MW. In Germany, Nofar Energy secured €86.5 million for a 104.5 MW/209 MWh storage project through a seven-year tolling agreement.

Is Bess optimization a golden age?

Meanwhile, in the UK, Gresham House and Octopus Energy signed a 568 MW/920 MWh, two-year tolling deal, solidifying the appeal of fixed-price structures for both developers and investors. At the same time, BESS optimization has entered its golden age.

How often should a Bess be replaced?

The rate at which a BESS degrades over time affects its long-term viability and the frequency with which it needs to be replaced. Regular maintenance, management, and potential replacement of parts contribute to the ongoing

expenses of a BESS.

Expected ROI of BESS project in Switzerland 2026

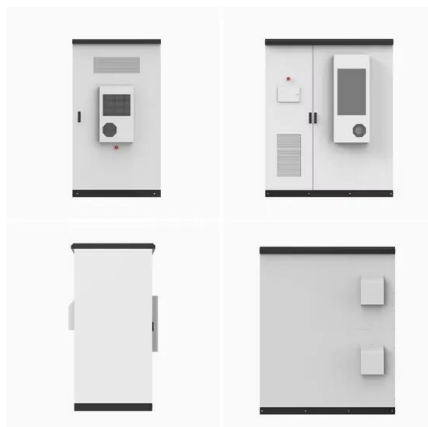

Alpiq acquires 200 MWh French BESS project from Harmony ...

Lausanne-headquartered Alpiq has acquired a massive BESS project in France from UK-based developer Harmony Energy as it seeks to expand its flexible asset portfolio. ...

The MENA region - the next hot market for energy ...

The rapid growth rate of energy storage in the MENA region, led by the GCC, is surprising many analysts. Saudi Arabia, in particular, is set to be the third biggest global BESS market after the USA and China in 2026.

EDPR informs on long-term contracts awarded for 160 MW of ...

The projects awarded include: A 60 MW (241 MWh) BESS project with COD expected in 2026, and; A 100 MW (400 MWh) BESS project with COD expected in 2029.

Georgia Bets Big On Battery Storage , ESG Review

This project is being engineered and constructed by and has a projected commercial operation date in May 2026. Hammond BESS (Floyd

County, 57.5 MW). The Hammond BESS project is a standalone BESS that ...

Energy Storage Systems (ESS) Projects and Tenders

Content Owned by MINISTRY OF NEW AND RENEWABLE ENERGY Developed and hosted by National Informatics Centre, Ministry of Electronics & Information Technology, ...

Understanding IRR Calculation for Battery Energy Storage Systems

IRR Definition: Internal Rate of Return (IRR) represents the discount rate at which the Net Present Value (NPV) of a project's cash flows equals zero, offering insights into ...

The Economics of BESS: Calculate ROI for Your Energy Storage

But before you invest, you must know the economics of BESS -- and how to calculate your Return on Investment (ROI). This guide explains the costs, savings, and key ...

The rise of bankable BESS projects in Europe

As the renewable energy sector rapidly evolves, battery energy storage systems (BESS) are emerging as a critical pillar for decarbonization. However, with capital constraints and rising market

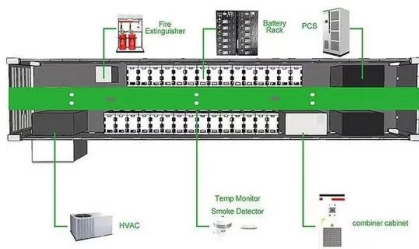

Bess project Comoros

rn Downs, Australia. The project will be built in two stages, with the first 60MW BESS mechanically complete by the third quarter of 2025 and the second 88MW BESS by the t come ...

Battery Storage Era: 5 Reasons BESS Is ...

Battery costs have fallen down substantially by over 90 percent in recent years to make energy storage an attractive investment for the solar and wind project developers. Notably, the global average lithium-ion battery pack ...

Big opportunities for BESS in 2025

In September, Scotland's Energy Consents Unit approved one of the UK's largest BESS projects to date, our 700MW Auchentiber BESS, in Port Glasgow. In 2025, we anticipate further consents for large-scale projects, ...

Italy: BESS wins nearly 600MW in 2027 capacity market

A BESS under construction from Enel, which won the lion's of BESS awards in the capacity market in 2021. Image: Enel. BESS technology has won the bulk of new resource ...

How is the USA driving change with Battery Energy Storage Systems (BESS)

Texas follows California with an installed battery storage capacity of 3.2 GW. Texas is expected to catch up quickly with California's progress, and developers are expected ...

Romania targets 5 GW of installed BESS capacity by ...

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026 under a plan that is seen to help it cope with high energy ...

5 Reasons Why BESS Will Be a Focal Point of Energy Business

...

The global energy storage market is expected to add over 220 GWh of new capacity in 2025, driven by a rise in tenders for BESS projects, many of which may be ...

2024 BESS revenue performance: a tale of 3 markets

In today's article we line these 3 markets up 'head to head' and look at BESS revenue stack performance in 2024 (vs the last 3 years). Key drivers of BESS revenue stack in 2023-24 There are some important common ...

UK BESS Outlook 2025: Key Developments to Watch

This legislation could impact how BESS projects are developed and approved, potentially leading to new compliance requirements for operators. Clean Power 2030 and ...

How Italy is Driving BESS Investment

The most relevant recent development for BESS operators in the Italian market is the introduction of MACSE. MACSE is a new capacity auction which offers 15-year contracts for energy storage projects. The first MACSE ...

The Economics of BESS: Calculate ROI for Your Energy Storage

Learn how to calculate the economics of BESS and your ROI. A practical guide for businesses and projects investing in battery energy storage systems.

ABB introduces Battery Energy Storage Systems-as-a-Service

BESS-as-a-Service is the first in a range of next generation service models being developed to remove the barriers to clean technology adoption and accelerate industries' ...

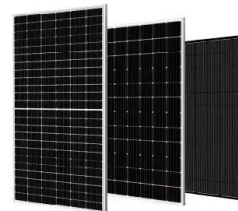

WFES 2026

KEY UPCOMING PROJECTS: Largest grid-scale BESS project of 12.5 GWh capacity to be built by BYD & SEC across 5 different sites in the Kingdom. Grid-scale BESS project of 7.8 GWh ...

Italian 2027 Capacity Market Auction: MACSE's impact & the BESS ...

BESS dominates new capacity in latest Capacity Market auctions as the now confirmed MACSE shapes market dynamics, with CM marginal price equal to 47EUR/kW.

Blanche BESS

The relevant assessments required in preparation to lodge the Development Approval application for the proposed Blanch BESS project are currently underway. The consent authority for the proposed project is the South ...

Understanding the Return of Investment (ROI) of Energy Storage ...

To accurately assess the financial viability of a BESS, several key indicators are used. This is a list of the main indicators we need to know and understand in order to assess the ROI.

What are the main indicators to assess the ROI of a ...

When assessing the return on investment (ROI) of a Battery Energy Storage System (BESS), several key indicators are crucial. Here are some of the main factors and indicators:

Engie breaks ground on 800 MWh battery in Belgium

The Vilvoorde BESS project will be launched in two phases, with the commissioning of 100 MW of batteries in September 2025, and a further 100 MW in January ...

How Italy is Driving BESS Investment

The most relevant recent development for BESS operators in the Italian market is the introduction of MACSE. MACSE is a new capacity auction which offers 15-year contracts ...

Power producer Alpiq acquires 100-MW battery ...

Swiss power producer and energy service provider Alpiq has bought a 100-MW/200-MWh battery energy storage system (BESS) project in France from the local unit of UK renewables developer-operator Harmony ...

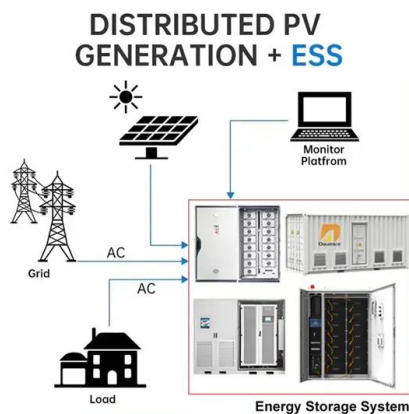

How to more accurately evaluate the financial ...

Predictive analysis is essential With project lifespans and expected returns often exceeding 20 years, decisions about BESS shape an organization's performance for years to come. Sound and thorough analysis, ...

Behind the numbers: BNEF finds 40% year-on-year ...

The average for a turnkey system in China including 1-hour, 2-hour and 4-hour duration BESS was just US\$101/kWh. In the US, the average was US\$236/kWh and in Europe US\$275/kWh, more than double China's ...

Ace Power Secures Federal Approval for 5.6 GWh ...

Ace Power has received federal approval for two major battery storage projects in Queensland, totaling over 5.6 GWh of capacity. These projects will enhance grid stability, support renewable energy integration, and contribute to Australia's ...
