

## Global PV Storage Insights

# Expected ROI of Solar Inverter project in Italy 2025

## Overview

---

What is the market share of solar energy in Italy?

The solar rooftop segment continues to dominate the Italian solar energy market, holding approximately 63% market share in 2024. This significant market position is driven by several factors, including the country's robust residential and commercial adoption of solar PV systems.

How much money will solarig invest in 2023?

In 2023, Edison announced a EUR 5 billion investment in solar installations to increase its installed capacity to 6 GW by 2030. Similarly, Solarig and Alantra launched a 1.9 GW solar PV investment vehicle valued at EUR 1.7 billion, with approximately half the planned projects located in Italy.

How can I get involved in the Italian solar market?

Get involved in the Italian solar market by attending the debut edition of Solar & Storage Italia – taking place 8-9 October. Italy's solar market has grown from 4,000 MW in 2005 to over 26 GW in 2023, driven by strong policies and cutting-edge technologies.

How does Italy support the growth of the solar sector?

The segment's growth is supported by various government initiatives and incentives, particularly in the agricultural sector where the European Commission approved Italy's EUR 1.2 billion scheme to support investments in rooftop solar panels.

How many GWh does solar energy produce in 2021?

The self-consumption of electricity from solar energy reached 5,179 GWh in 2021, representing 20.6% of overall solar PV production, indicating strong demand for direct energy consumption models among commercial and industrial users. The market is experiencing substantial investment flows and technological advancement in solar infrastructure.

What is the industrial and commercial solar market?

The industrial and commercial solar segment represents a significant portion of the Italian solar energy market, driven by businesses seeking to reduce their electricity costs and meet sustainability goals.
