

## Global PV Storage Insights

# Expected ROI of Solar Inverter project in South Africa 2030

## Overview

---

How many solar panels will South Africa have by 2030?

Forgotten your password?

A new Green Cape report is forecasting that 6 GW of new private solar PV and 3.5 GW of new private wind capacity will be installed in South Africa by 2030, involving total investments of R132-billion.

How much will solar PV investment cost in 2025?

The 'Large-Scale Renewable Energy Market Intelligence Report 2025' estimates that the solar PV deployment will involve investments of R72-billion by 2030, while the investment value of the wind projects is estimated at R60-billion.

Is South Africa a good place to invest in solar energy?

South Africa has abundant solar resources, making it a prime location for the development of solar energy projects. The country has set a target of generating 18 GW of renewable energy by 2030, with solar energy expected to make up a significant portion of this target.

Why did South Africa experience uneven renewables investment?

South Africa experienced uneven renewables investment due to a lack of stability in the government's auction program, REIPPP. This program is the primary route to market for new renewable energy projects (South Africa's power sector is highly regulated).

Will South Africa invest \$30 billion in New wind and solar?

South Africa's 2020-30 allocation of 14.4GW of new wind capacity and 4GW of new PV capacity under the 2019 Integrated Resource Plan (IRP) presents an investment opportunity for \$30 billion into new wind and solar assets by 2030. This would represent a 50% increase in investment into wind and solar

compared to the previous decade.

Will solar PV and wind power grow by 2030?

“Private renewable energy developments are expected to increase by 6GW for solar PV and 3.5GW for wind power by 2030. The investment values of these technologies are R72 billion for solar PV and R60 billion for wind power projects by 2030.
