

## Global PV Storage Insights

# Expected ROI of business energy storage project in Czech 2025

## Overview

---

What will the Czech electricity storage scheme do in 2025?

In an announcement released on March 7, 2025, the executive arm of the European Union said that the Czech scheme will support the installation of at least 1.5 GWh of new electricity storage facilities. The measure will be open to all storage technologies directly connected to the transmission network or distribution network.

How can European policymakers help the battery storage sector?

Recommendations How can European policymakers help the battery storage sector Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.

How many GWh of battery energy storage systems are installed in 2024?

2025-2029 3.1. European battery storage market batteries market growth: inflection point toward next stronger growth phase In 2024, Europe installed 21.9 GWh of battery energy storage systems (BESS), marking the eleventh year of record-breaking annual additions since 2013, when our records began. The latest additions total 21.9 GWh.

Which countries are leading the battery storage market in 2024?

Germany continues to lead the market and deliver almost 70% of the annual capacity. In 2024, Europe's top three battery storage markets - Germany, Italy, UK - solidified their dominance, with Austria and Sweden closing the 'top 5' ranking (see Fig. 2). 2024 marked the first year when Germany's share of total capacity exceeded 70%.

How many micro-storage systems were installed in 2024?

At a lower rate, with 7.5% annual growth and 430 MWh of micro-storage installed. However, in terms of the number of systems, 2024 saw a 44% increase in the number of systems installed.

number of installed micro-storage systems, from 87,000 in 2023 to 125,000, or over a fifth of the total annual home storage market (580,000).<sup>4</sup> This incr.

How will Czech state aid help a net-zero economy?

The aid will take form of direct grants which will cover up to 50% of the investment cost of supported projects. From ESS News The European Commission (EC) has authorized a €279 million (\$303 million) Czech state aid scheme to support investment into electricity storage facilities and foster the transition towards a net-zero economy.
