Expected ROI of containerized BESS project in France 2030

Overview

How much money could a 2-hour Bess make in France?

Discover how a 2-hour BESS in France could have earned €1.4 million annually under April 2025 price conditions. Learn what drove the price spike.

Which region in France has the largest Bess market?

Ile-de-France (Northern France): As the most populous and industrialized region in France, Ile-de-France stands as the largest BESS market. This growth is propelled by the rising integration of renewable energy, amplified demand for backup power, and supportive government policies.

Is Bess a profitable market?

BESS is a fast growing market but is very country and use case specific. Profitability is a challenge in many regions, even in mature countries. 1. ENGIE's estimates including BESS – 2. Once renewables penetration is above 30% - 3. Installed capacity per region – BNEF September 2023 Why do we need BESS in the electricity market?

.

How does Bess support EV charging in France?

These contributions foster grid stability and effective energy management. Electric Vehicle Integration: The burgeoning electric vehicle (EV) market in France has created opportunities for BESS to support EV charging infrastructure, manage grid impacts, and facilitate vehicle-to-grid (V2G) capabilities.

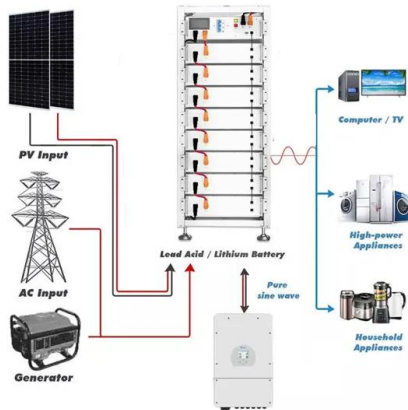

How do government policies support Bess projects?

Policy Support: Government policies and incentives, such as feed-in tariffs and subsidies, serve as catalysts for the implementation of BESS projects and encourage investment in energy storage technology.

Is there a business case for large scale Bess?

Need for up to 9GW BESS announced by TSO, but current grid tariff exposure is biggest hurdle for viable Business Cases for Large scale BESS. Government support generates advantage for a company over its competitors, and are therefore generally prohibited by the EU, unless it is justified by reasons of general economic development.
