Expected ROI of enterprise ESS system project in Spain 2026

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

Overview

How many Bess projects are there in Spain?

In March 2025, UK companies Renewco and Atlantica announced the development of up to 2.2GW of BESS projects across Spain. Other projects in the pipeline primarily involve storage co-located with solar or wind generation. According to BloombergNEF, the total capacity currently in the BESS pipeline is around 3GW.

Why is BW ESS partnering with ibersun?

“We are proud to be developing our first projects in Spain with Ibersun, a trusted partner with over 25 years of market experience. We have a common objective to improve Spain’s grid resilience and support the market’s ambitious energy storage growth targets,” said Isaac Garcia Moreno, executive director of BW ESS.

Why should Spain invest in a Bess fleet?

In addition to stabilising the energy grid, the expansion of Spain’s BESS fleet will also prevent energy from being wasted, when supply exceeds demand. The joint venture, targeting greenfield, four-hour duration assets, will progress an initial 2.2 GW pipeline of eight projects across Spain.

What is Spain's regulatory framework for energy storage?

Spain’s regulatory framework for BESS is set in its Strategy for Energy Storage. The Strategy identifies the required regulatory measures – such as grid access, market structure, and addressing double tolling – that are currently needed to ensure the deployment of a solid energy storage market.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to

integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

Expected ROI of enterprise ESS system project in Spain 2026

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

BW ESS and Ibersun sign joint venture to develop ...

24 June 2025, MADRID -- Global energy storage owner-operator BW ESS and Getxo-based energy storage developer Ibersun have signed a joint venture to develop, in its first phase, 2.2GW of utility-scale battery energy storage system ...

Automotive Electronic Suspension System (ESS) Market Report 2026...

The Automotive Electronic Suspension System (ESS) Market presents several lucrative investment opportunities due to its technological advancements and growing demand ...

12.8V 200Ah

The MENA region - the next hot market for energy ...

"The MENA region - the next hot market for energy storage?" I asked in an article back in October 2017. It took a bit longer than I expected, but seven years later it's time to replace the question mark with an exclamation ...

BW ESS and Ibersun sign joint venture to develop 2.2GW BESS ...

These projects will be owned equally by BW ESS

and Ibersun. The partners expect each project to achieve Ready-to-Build status within two years and anticipate pursuing ...
