Expected ROI of flow battery system project in Kuwait 2030

Overview

What is the expected CAGR of the flow battery market?

The global flow battery market size was valued at USD 328.1 million in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 22.6% from 2023 to 2030. The rising demand for energy storage systems globally is the primary factor for market growth.

What is a Technology Strategy assessment on flow batteries?

This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

What is China's first megawatt iron-chromium flow battery energy storage project?

China's first megawatt iron-chromium flow battery energy storage demonstration project, which can store 6,000 kWh of electricity for 6 hours, was successfully tested and was approved for commercial use on February 28, 2023, making it the largest of its kind in the world.

Who are the players operating in hybrid flow batteries in 2022?

Some of the players operating in the hybrid flow battery market include Redox One, Deeya, and Primus Power, among others.

Why do flow battery developers need a longer duration system?

Flow battery developers must balance meeting current market needs while trying to develop longer duration systems because most of their income will come from the shorter discharge durations. Currently, adding additional energy capacity just adds to the cost of the system.

Who are flow battery subject matter experts?

The Framework Team interviewed 26 flow battery subject matter experts (SMEs) who represented 20 organizations, ranging from industry groups (e.g., ESS, Inc., Lockheed Martin Corporation) to vendors (e.g., Primus Power, Largo Inc.) and National Laboratories (e.g., SLAC National Accelerator Laboratory).
