

## Global PV Storage Insights

# Expected ROI of lithium solar battery project in Saudi Arabia 2025

## Overview

---

Why is Saudi Arabia investing in lithium?

This surge in energy storage capacity is complemented by Saudi Arabia's strategic investments in the lithium supply chain, a critical component for battery production. Saudi Aramco, in partnership with state-owned mining company Ma'aden, plans to commence commercial lithium production by 2027.

How can Saudi Arabia integrate Lithium production into its long-term strategy?

The integration of lithium production into Saudi Arabia's long-term strategy includes: Building Lithium Processing Facilities – Establishing refineries to convert raw lithium into battery-grade materials. Investing in EV and Battery Manufacturing – Encouraging companies to set up production plants in the Kingdom.

How has the lithium market changed in 2022?

In fact, the lithium market has experienced significant fluctuations. In 2022, lithium prices soared to \$80,000 per metric ton due to fears of supply shortages. However, by January 2023, prices had plummeted to just over \$13,000 per metric ton as supply chains stabilized and demand projections were adjusted.
