

Global PV Storage Insights

Expected ROI of rooftop solar storage project in Croatia 2026

Overview

What is a solar project in Croatia?

Croatia has launched a project called PVMax, which is expected to result in the deployment of rooftop solar systems on over 3,000 buildings in the country, with a total installed capacity of some 100 MW. Investments in these solar power plants are expected to reach about EUR 66.8 million.

How much solar did Croatia install in 2024?

But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia. The figure is an increase on the 238.7 MW of solar that were installed in 2023.

How many solar power plants are there in Croatia?

There are currently over 26,000 solar power plants connected to the grid in Croatia with a combined capacity of 872.1 MW, according to RES Croatia's figures, meaning the country is on course to join the gigawatt club this year.
