# Expected ROI of solar storage inverter project in Oman 2026

## Overview

---

Will Oman have a solar energy storage system?

Additionally, PDO is finalizing plans for a 100 MW solar PV-based IPP, named the 'North Solar Storage IPP,' set to include Oman's first battery energy storage system (BESS). This BESS, using lithium-ion battery technology, will store electrical energy and supply a maximum of 100 MW peak power to PDO's grid during daylight hours.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.

What is the most optimum generation mix for Oman up to 2040?

PWP about to finalise a strategic study which identified the most optimum generation mix for Oman up to 2040. For the next Solar PV IPP PWP exploring the options to include a small scale BESS; co-located with the PV Plant. The main purpose is for frequency control and to increase the plant availability during the ramp-up and ramp down moments.

Will Nama develop a swathe of new solar IPPs?

At the same forum on Thursday, Nama's Eng Al Abri announced plans for the development of a swathe of new Solar IPPs with a capacity aggregating around 4,500 megawatts (MW) and entailing an estimated investment of \$2.8 billion.
