# Expected ROI of wall mounted battery project in Philippines 2030

## Overview

---

Why is the Philippines betting on battery energy storage systems?

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.

Why is the Philippines scrap battery industry growing?

The Philippines scrap battery industry has been growing steadily due to increased adoption of low-cost lead acid batteries used primarily for automotive applications or backup power supplies for residential households or businesses across the country.

How many Bess projects are there in the Philippines?

DOE data reveals 1,850 MW of committed BESS projects by 2030 and 1,951 MW of indicative projects by 2033, as of November 2024. The agency projects 330 MW of BESS capacity coming online this year alone. “We have seen that battery electricity storage is a crucial technology for the Philippines,” the DOE said.

How many MW will be installed by 2033?

The country anticipates nearly 3,800 megawatts (MW) of installed BESS capacity by 2033, a move that promises to transform the RE landscape. DOE data reveals 1,850 MW of committed BESS projects by 2030 and 1,951 MW of indicative projects by 2033, as of November 2024. The agency projects 330 MW of BESS capacity coming online this year alone.
