Factory solar storage EPC turnkey quotation per 2MW 2026

Overview

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

Do solar batteries increase the cost of a 2MW solar power plant?

The inclusion of solar batteries increases the 2MW solar power plant cost, although the advantages still outweigh the cost. With the reliance on solar batteries, your business can thrive in remote locations where grid accessibility is costly or unavailable.

What is a high capacity solar power plant?

High-capacity Solar systems of over 100kW are called Solar Power Stations, Solar Farms, Energy Generating Stations, or Ground Mounted Solar Power Plants. A 2MW solar power plant can run a commercial establishment independently from the Electricity grid.
