Gel battery storage supplier quotation in Bahamas 2026

Overview

What are Deka sealed GEL cells & AGM batteries?

Deka Sealed Gel Cell And AGM Batteries For Off-Grid Solar PV Applications. The East-Penn Deka Solar line of sealed gel & AGM batteries are field-proven with tens of thousands of solar installations all over the world.

Why are gel and AGM batteries better than lead-acid batteries?

The "acid-starved" condition of Gel and AGM batteries protects the plates during heavy deep-discharges, giving more protection to the plate. Because of this inherent protection, AGM and Gel batteries are better suited for super-deep discharge applications than traditional lead-acid batteries.

Do gel batteries outlast AGM batteries?

In cold climates AGM capacity loss is minimal and will have a slightly higher voltage at lower temperatures. In hot weather climates, gel batteries tend to outlast AGM batteries due to the nature of the Deka gel electrolyte formula. Both are considered "non-spillable".

What is the difference between gel electrolyte & absorbed glass mat batteries?

Gel electrolyte and Absorbed Glass Mat batteries are valve regulated lead-acid. In a gel battery, the electrolyte does not flow like a normal liquid. The electrolyte has the consistency and appearance of petroleum jelly. In an AGM battery, highly porous microfiber separators completely absorb and trap the electrolyte.
