# Government procurement price of microgrid storage in Saudi Arabia

## Overview

---

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China.

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China.

The engineering, procurement and construction (EPC) contracts for the three energy storage system projects recently awarded in Saudi Arabia are estimated to be worth over \$800m. National Grid Saudi Arabia awarded Riyadh-based investment group Aljihaz Holding the contract to build the facilities.

Saudi Electricity Company (SEC) receives Bidders Proposals for Battery Energy Storage Systems (BESS) having Combined Capacity of 1,000 MW. The Project location is in Tabuk and Hail in western region and central region of Saudi Arabia. Following is the list of bidders who submitted the lowest Price.

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China. Energy storage costs have been on the sort of slide.

Saudi Arabia's government entity tasked with procuring electricity generation projects has commenced the qualification process for a 2GW/8GWh battery storage tender. Saudi Power Procurement Company (SPPC), licensed as the sole buyer of electrical energy and capacity from sources within the Kingdom.

The SPPC has invited bids for large-scale Battery Energy Storage Systems (BESS), with submissions due by 2 June 2025 The Saudi Power Procurement Company (SPPC) has issued a Request for Proposals (RFP) for Group 1 Battery Energy Storage Systems (BESS) projects, inviting qualified bidders to.

The national renewable energy targets set for 2030, ranging between 15-50% of electricity generation, depict governments' will to double down efforts and increase the share of renewables in the energy mix. Meeting the national renewable energy targets requires scaling up and systematic integration.
