# Home energy storage project financing options in Dominican 2025

## Overview

---

Veras pointed out that energy storage, once financially unviable, is now becoming a reality due to technological advancements and supportive policies, including resolutions promoting storage in solar projects.

Veras pointed out that energy storage, once financially unviable, is now becoming a reality due to technological advancements and supportive policies, including resolutions promoting storage in solar projects.

Veras pointed out that energy storage, once financially unviable, is now becoming a reality due to technological advancements and supportive policies, including resolutions promoting storage in solar projects. A notable achievement is the upcoming launch of the first four-hour energy storage system.

– The Superintendency of Electricity (SIE) approved Resolution SIE-092-2025-LCE, which sets the technical and regulatory basis for a new national public tender to add up to 600 megawatts (MW) of solar and wind generation capacity. Under the resolution, the awarded energy will be contracted.

The Dominican Republic is rapidly integrating renewable energy sources into its national grid. By 2025, they aim to achieve 25% renewable energy dependence. This ambitious goal has spurred significant growth, with renewable energy contributing nearly 19% of the country's total energy demand in.

Energía Turística S.A. (Enertur), a subsidiary of InterEnergy Group, has secured financing from IDB Invest, FMO, and FinDev Canada for the development of a new 70 MW solar PV and 30 MWh battery energy storage system in the Dominican Republic. Not already a subscriber?

Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by

2027 during a speech at a Caribbean energy forum. Santos said a renewable energy tender this year, involving the National Energy Commission (CNE), would be.

The Dominican Republic has launched its first tender for up to 600 MW of solar and wind capacity with mandatory storage, requiring all projects to include battery systems capable of at least four hours of backup. Winning projects, ranging from 20 MW to 300 MW, will sign long-term dollar-denominated.

## Home energy storage project financing options in Dominican 2025
