Industrial energy storage tender price in Poland 2025

Overview

Are energy storage systems a new technology in Poland?

Energy storage systems are a relatively new technology in the Polish capacity market. They have participated in two auctions so far: making their official debut in 2022 (with 2027 delivery year) and subsequently dominating the competition in the 2023 auction.

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend—it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16,

2025, or until funds are exhausted.

What will Poland's energy landscape look like in 2025?

Jacek Zarzycki, Business Development Manager at Eaton, highlights five key areas shaping Poland's energy landscape in 2025. 1. Energy Price Caps Extended For individual consumers, the energy price cap will remain in place until September 30, 2025, limiting electricity costs to a maximum of 500 PLN/MWh (plus excise tax and VAT).

Industrial energy storage tender price in Poland 2025

Poland

The average spot price of CO2 in 2022 amounted to \$44.2/t CO2. Poland's revenue from the sale of CO2 allowances was more than \$4.94 billion in 2022. There is an ongoing energy crisis, triggered by Russia's aggression ...

What to expect following Poland's 2025 retail ...

Electricity prices for households to remain unchanged until September 2025 While retail electricity prices in Poland are heavily regulated, authorities have made several significant interventions in recent years to ...

'Energy storage guarantees energy security for Poland'
