Analysts predict tender prices for utility-scale batteries could drop by 18-22% by 2025 compared to 2023 levels, thanks to: Raw material cost stabilization (goodbye, lithium price rollercoasters?)

) While lithium-ion batteries still dominate 78% of tenders (no surprise there), 2025 could be the year.

The average lithium-ion accumulator import price stood at \$24 per unit in 2023, picking up by 145% against the previous year. In general, the import price enjoyed a prominent increase. As a result, import price reached the peak level and is likely to continue growth in the immediate term. There.
