Lithium iron phosphate battery supplier quotation in Poland 2030

Overview

The global lithium iron phosphate (LiFePO₄) battery market size was estimated at USD 8.25 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 10.5% from 2024 to 2030. An increasing demand for hybrid electric vehicles (HEVs) and electric vehicles (EVs) on account of rising.

The rising number of portable consumer electronics items that deploy batteries has resulted in an increased consumption of rechargeable batteries.

Based on application, the market is categorized into portable and stationary. The portable application segment dominated the global market and accounted for more than 50.0% share of the overall revenue in 2023. This is attributed to the high.

Based on end-use, the market is categorized into automotive, power, industrial, and others. The others end-use segment dominated the market and accounted for over 35.0%.

Asia Pacific accounted for more than 31.0% share of the overall revenue in 2023. Asia Pacific is expected to witness significant growth from 2024 to 2030 owing to the established automotive sector and rising demand for consumer electronics across the region. Growing.
