A typical 10kWh system that costs \$4,950 in China [4] balloons to \$7,000+ after hitting Yemeni ports. Why?

Consider: While China's battery giants like CATL and BYD dominate 56% of global production [2] [6], their price wars barely dent Yemen's market. The 314Ah battery cells priced at \$0.305/Wh in.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and
