Office building energy storage tender price in Italy 2030

Overview

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW / 11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.

What is the largest energy storage system in Italy?

The ESS is the largest in Italy and one of the largest in Europe since it can store two-megawatt hours (2MWh) of renewable energy for release into the grid as needed.

Should you invest in a capacity market in Italy?

The capacity market is well-suited to industrialised northern Italy with its developed infrastructure and higher industrial demand for power. While it offers 15-year contracts like MACSE, investors can stack their capacity payments (payments are then available when needed) on top of what they earn from selling energy in the wholesale market.

Office building energy storage tender price in Italy 2030

Planning issues to hold back Italian energy storage growth

Italian transmission system operator (TSO) Terna said that 1GW of storage linked to solar farms will be needed by 2025 to help maintain system adequacy, with additional ...
