On grid solar storage supplier quotation in Poland 2026

Overview

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

How much storage capacity does Poland have in 2024?

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW.

Is Poland a hub for solar and storage projects?

With the upcoming regulations for storage assets providing much-needed clarity, Poland is positioning itself as a hub for integrating solar and storage projects, despite the challenges posed by grid curtailment, high land lease costs, and interest rates. Why Attend?
