Portable ESS system cost breakdown in Singapore 2026

Overview

How will ESS Technology be tested in Singapore?

The ESS technologies deployed, redox flow and lithium-ion batteries, will be evaluated for their performance under Singapore's hot, and humid environment. The test-bed will also help establish clear technical guidelines for ESS deployment (e.g. grid connection and safety requirements for installation).

Can ESS be deployed in Singapore?

ESS will be effectively deployed in Singapore. The EMA-SP ESS Test-Bed awarded in October 2017 would implement Singapore's first utility-scale ESS to better understand the feasibility of deploying grid-level ESS technologies in Singapore's hot and humid environment. 1.4 Through these efforts, the EMA seeks to catalyse ESS deployment in Singapore.

Do I need a wholesaler licence for ESS?

Conditions are applicable for ESS. If the ESS is participating specifically in the Interruptible Load or Demand Response schemes only, it can choose to apply for a Wholesaler licence. Electrical Installation Licence: Electrical Installation Licence is required for all non-domestic electrical installations.
