Residential ESS tender price in Ethiopia 2030

Overview

What is the Ethiopian urban land policy & housing & real estate markets assessment study?

The Ethiopian urban land policy, housing, and real estate markets assessment study has taken into consideration the previous studies such as the Ethiopia urban land supply and affordable housing study (2019) and the Ethiopia urbanization review (2015).

Why are real estate prices rising in Ethiopia?

The trend in real estate prices in Ethiopia over the past few years has been quite dynamic, reflecting the country's broader economic and political shifts. Generally, there has been a trend of increasing real estate prices, particularly in urban areas.

Why is the real estate industry underdeveloped in Ethiopia?

The real estate industry is underdeveloped and has had substandard practices in Ethiopia, especially in Addis Ababa. There is no system that delivers reliable information about the price, size, quality and availability of utilities, which could have been the basis for decision making by consumers, banks, cities, etc.

Can the public sector meet escalating urban housing demand in Ethiopia?

Moreover, there are spontaneous relocations to cities and towns, putting pressure on the government to satisfy housing demands. It has become uncertain for the public sector to meet an escalating urban housing demand along with a doubling of the current population in Ethiopia.

What is the difference between urban and rural real estate prices in Ethiopia?

The comparison between urban and rural real estate prices in Ethiopia shows a significant difference. Urban real estate, particularly in major cities, is much more expensive than rural real estate. This disparity is due to higher demand

in urban areas, more developed infrastructure, and greater economic opportunities.

Is real estate housing a viable option for urban Ethiopians?

With this escalating urban housing demand, the private sector has also engaged in developing real estate housing in urban Ethiopia, but its contribution is very small in filling the gap. Nevertheless, evidence shows that many urban Ethiopians still live in houses that are not conducive to a healthy life.
