Could solar power be the cheapest energy resource in Italy?

Alex Brierley, Co-head of Octopus Energy Generation, said: “Businesses in sun-soaked Italy are sitting on a golden opportunity to harness what’s one of the cheapest energy resources - solar power.

How much solar power does Italy have in 2023?

Italy brought 1,058 MW of solar photovoltaic (PV) parks in the first quarter of 2023, reaching a cumulative installed capacity of over 26,100 MW, shows data released by the domestic solar energy association, Italia Solare.

What is the market share of solar energy in Italy?

The solar rooftop segment continues to dominate the Italian solar energy market, holding approximately 63% market share in 2024. This significant market position is driven by several factors, including the country's robust residential and commercial adoption of solar PV systems.

Why should businesses invest in solar energy in Italy?

Businesses will be able to lock in fixed prices for the solar energy over the long-term, allowing them to say goodbye to fluctuating energy bills. Thanks to Italy’s streamlined permitting process for smaller distributed energy sources like these, the projects will be able to quickly connect to the grid.

Does Italy have a roadmap for solar power development?

Yet, Italy has the potential to do more. In general, Italy lacks a clear roadmap for the development of solar capacity. Financial incentives include tax deductions for PV system purchases and investment subsidies at regional levels, with recent initiatives targeting rooftop solar PV in agriculture and low-income households.

Does octopus invest in renewables in Italy?

Octopus has invested in several new wind, solar and battery storage projects across Italy over recent years, planning to invest €1bn in Italian renewables by 2030. This is also the latest in a string of global deals Octopus has made in recent years to roll-out rooftop solar development, including in the US, Ireland, UK, Portugal and France.
