Solar Inverter EPC turnkey quotation per 100MW 2026

Overview

Why should you choose total solar for your EPC project?

Total Solar is equally active in the development of EPC projects. We ensure that the solar panel system is designed, inspected, and then constructed so that it can harvest the maximum amount of electricity for the respective application.

How many inverters does a PV system use?

The DC cables are connected to 19 utility-scale central inverters, each rated at 4 MW ac, giving the PV system a rated AC power output of 76 MW ac, which corresponds to an inverter loading ratio of 1.32. The inverters are made in Europe in a plant that produces 250 of them each year. These inverters are not subject to import tariffs.

What does a solar EPC contractor do?

Solar EPC Contractors for Solar Projects inspect the application area and take reasonable factors into account before creating a plan for our EPC project. As well, we develop a design that utilizes top-notch technology, enabling us to generate the most solar energy possible.
