The country has set a target of 79% renewables in the power mix by 2030 and plans to invest US\$33 billion in the energy sector by 2025. Bolivia's history with renewable energy is relatively short, with most significant developments occurring in the past decade. Despite this, the country has made.

The role of energy storage in Bolivia's energy transition is a crucial factor in the country's efforts to shift towards a more sustainable and environmentally friendly energy landscape. As Bolivia aims to increase its reliance on renewable energy sources, such as solar and wind power, the need for.

The world's largest PV-diesel hybrid power plant system with battery storage was commissioned in December 2014, in the Bolivian province of Pando. SMA is not only supplying photovoltaic inverters for this project, but is also providing an SMA Fuel Save Controller for demand-driven control of solar.
