

Global PV Storage Insights

Solar storage container project financing options in Vietnam 2025

Overview

This demonstrates a clear sign that Vietnam doesn't lack investor interest and that green finance is already flowing at scale. This means the real question is not "when" will Vietnam's solar potential take off, but what's holding it back from functioning efficiently?

Our answer is nothing.

This demonstrates a clear sign that Vietnam doesn't lack investor interest and that green finance is already flowing at scale. This means the real question is not "when" will Vietnam's solar potential take off, but what's holding it back from functioning efficiently?

Our answer is nothing.

Last week, our Managing Director Thomas Jakobsen joined two high-level panels at the annual Solar & Storage Live Vietnam 2025, sharing practical insights into Vietnam's energy sector future outlook. On the first panel: Unlocking Vietnam's solar and wind potential: When will green financing truly.

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

Solar & Storage Live Vietnam showcases innovative, market leading solutions for Commercial & Industrial solar projects, large scale utility projects, residential projects, small scale community-based projects and the technologies that support them. This is where buyers, installers and operators.

Ho Chi Minh City, July 15, 2025 – The Solar & Storage Live Vietnam 2025 event, one of the largest clean energy forums in the country, has successfully concluded, attracting a large number of experts and businesses operating in the energy sector. At this event, Power Engineering Consulting Joint.

AHK Vietnam and GIZ are proud to support Solar & Storage Live Vietnam 2025 as official Association Partners. This two-day event convenes 120+ speakers, 250+ exhibitors & sponsors, and 5,500+ professionals from across the clean energy, industrial, and financial sectors. The programme is designed to. What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

What is the new tariff structure for solar projects in Vietnam?

Under the updated tariff structure, solar projects are now divided into ground-mounted and floating categories, and segmented further by region—North, Central, and South Vietnam. Tariffs are calibrated based on solar resource availability, infrastructure costs, and local electricity demand, with higher rates awarded to projects that integrate ESS.

What are the requirements for a battery project in Vietnam?

The Vietnamese authorities also decided that battery projects under the FiT

scheme must have at least 10% of a PV plant's capacity and offer at least 2 hours of storage. According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.
